

## Laboratoriya 13

**Mavzu:** JavaScript elementlari bilan ishlash (click, submit, change)

### Ish maqsadi:

Ushbu laboratoriya ishining maqsadi — JavaScript orqali HTML elementlarida yuz beradigan click, submit va change kabi asosiy hodisalarni (eventlarni) qabul qilish, ularni qayta ishlash va foydalanuvchi bilan interaktiv muloqotni tashkil qilishni o‘rganish. Shuningdek, event listenerlardan to‘g‘ri foydalanish, forma ma’lumotlarini tekshirish va element holatini dinamik ravishda o‘zgartirish ko‘nikmalarini shakllantirish.

### Nazariy qism:

JavaScriptda hodisalar (Events) tushunchasi

JavaScriptda hodisa (event) — bu foydalanuvchi yoki brauzer tomonidan sodir bo‘ladigan harakatdir. Masalan:

tugmani bosish (click),

matn kiritish (input),

forma yuborish (submit),

sahifa yuklanishi (load),

tanlash maydonining o‘zgarishi (change) va boshqalar.

Hodisalarni ushlash orqali interaktiv veb-sahifalar yaratiladi.

### Event Listener

Hodisalarni kuzatish uchun JavaScriptda `addEventListener()` funksiyasi qo‘llaniladi:

```
javascript

element.addEventListener("eventNomi", function() {
    // hodisa sodir bo'lganda bajariladigan kod
});
```

### Click hodisasi

click — foydalanuvchi elementni sichqoncha bilan bosganda ishga tushadi.

```
javascript

const btn = document.getElementById("myBtn");

btn.addEventListener("click", function() {
    alert("Tugma bosildi!");
});
```

## Change hodisasi

change — input yoki select elementi qiymati o‘zgartirilganda sodir bo‘ladi.

```
javascript

const selectBox = document.getElementById("colors");

selectBox.addEventListener("change", function() {
    console.log("Tanlangan rang:", this.value);
});
```

## Index.php kod:

```
<!DOCTYPE html>
<html lang="uz">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Forma</title>
    <style>
        body { font-family: sans-serif; padding: 20px; }
        form { max-width: 400px; margin: 0 auto; }
        div { margin-bottom: 15px; }
        label { display: block; margin-bottom: 5px; }
        input { width: 100%; padding: 8px; box-sizing: border-box; }
        button { padding: 10px 15px; background-color: #28a745; color: white;
border: none; cursor: pointer; }
        button:hover { background-color: #218838; }
    </style>
</head>
<body>

    <h2 style="text-align:center;">Ma'lumotlarni kiriting</h2>

    <form action="2.php" method="POST">
        <div>
            <label for="ism">Ism:</label>
            <input type="text" id="ism" name="ism" required>
        </div>
```

```

        <div>
            <label for="email">Email:</label>
            <input type="email" id="email" name="email" required>
        </div>

        <div>
            <label for="telefon">Telefon:</label>
            <input type="tel" id="telefon" name="telefon">
        </div>

        <div>
            <label for="manzil">Manzil:</label>
            <input type="text" id="manzil" name="manzil">
        </div>

        <button type="submit">Yuborish</button>
    </form>

</body>
</html>

```

## 2.php kod:

```
